Authorization for this examiner's amendment was given in a telephone interview with Sam Ntiros on 11/04/2010.

The application has been amended as follows:

The specification amendment submitted 5/06/2009 has been entered; all paragraph numbers in the following refer to the paragraphs in the pre-grant publication, document number US 2007/0068181.

In paragraph [0002], "an external and internal temperature" has been changed to --external and internal temperature--.

In paragraph [0005], "reducing a pressure of the refrigerant" has been changed to --reducing the pressure of the refrigerant--.

In paragraph [0009], "senses a pre-set temperature of the refrigerating chamber" has been changed to --with a pre-set temperature senses the temperature of the refrigerating chamber--

In paragraph [0015], "cooling air is evaporated." Has been changed to --refrigerant is evaporated.--

In paragraph [0020], "varying a cooling capacity" has been changed to --varying the cooling capacity--

In paragraph [0051], the phrase "according to" is used twice. The second instance has been changed to --because of--

In paragraph [0058], "Thus, when the, amount of cooling air supply is the minimum, the compressor, is rotated counterclockwise," has been changed to --Thus, when the amount of cooling air supply is the minimum, the compressor is rotated counterclockwise,--.

In paragraph [0064] line 3 the word operatori has been changed to --operation--

In paragraph [0081] line 10, "a rotation direction" has been changed to --the rotation direction--

In paragraph [0108], "or turn of the compressor In this case," has been changed to --or turn off the compressor. In this case,--

In paragraph [0125], "a first operation range of a temperature sensor of the refrigerator is selected (step S74) and a signal for controlling the operation of the compressor according to the first operation range (step S75)." has been changed to --a first operation range of a temperature sensor of the refrigerator is selected (step S74), and a signal for controlling the operation range of the compressor according to the first operation range is also selected (step S75).--

The end of paragraph [0139] has been changed from a comma to a period.

In the first line of paragraph [0141], the space between "con" and "trolling" has been removed.

In paragraph [0153], "is rotate" has been changed to --rotates--

2. The following is an examiner's statement of reasons for allowance: the combination of setting the temperature sensor range according to the rotation direction, and then operating the system according to the range selected, is not taught or suggested by the prior art of record. Specifically, in addition to this absence in art cited previously, it is further not taught or suggested by Sisk (US Patent No. 4,248,053), which does disclose a reversible variable capacity compressor with different stroke length in different directions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALEXIS K. COX whose telephone number is (571)270-5530. The examiner can normally be reached on Monday through Thursday 9:30a.m. to 7:00p.m. EST.
